

SECURA APP

First Technology has an app called Secura. <https://www.secura.co.za/>.

The product was launched on Jacaranda FM in September 2019 to both corporates and consumers. <https://www.jacarandafm.com/shows/breakfast-martin-bester/secura-great-new-security-service-help-south-africans/>

The app was developed as an emergency “mobile panic button” that connects seamlessly to many of **South Africa’s leading private armed response companies**, in every region of the country, at the click of a button.

Secura ensures the quickest response times in an emergency situation, ensuring that help is sent to your exact location.

Using GPS and smart technology, the closest private armed response vehicle to you, anywhere and anytime in South Africa, will be alerted immediately of your emergency. In addition, we also have a trained and dedicated 24/7 call centre staff that will assist you, as a user, if needed throughout the situation.

The technology has already been tested and is actively deployed across a large number of users.

FIRST TECHNOLOGY EMPLOYEE BENEFIT OF SECURA

The app is available on the Apple App Store or Android Play Store at a Standard Pricing of R49 per user, per month.

We are therefore pleased to inform you that First Technology is offering the app to its employees and their immediate family members at R30 per user, per month. Limited to 10 family members per employee. (E.g. R30 for 1 user, R60 for 2 Users, etc.).

The HR department will fund the remaining portion of the purchase price on a monthly basis for you and your family members. We want to ensure that we can add extra safety and security precautions for not only yourself but for your Spouses, Parents, Children, etc.

Upon confirmation of interest, Secura will issue you a coupon code per user to start using the app immediately. The R30 per user fee will be deducted from your salary each month and will reflect on your payslip.

Please note this benefit is only for First Technology employees. Should you resign, this benefit will fall away and you will have to re-subscribe on the app for full amount.

Please note that the user fee deduction will be made based on the total coupons requested to the Secura team.

Please advise if you are interested and how many users you would like to add (10 maximum) and provide the following information to HR:

1. Name and surname of each user.
2. Contact number of each user.
3. Relationship to you.
